TracPipe® CounterStrike®
Flexible Gas Piping by OmegaFlex®

TracPipe® CounterStrike® Commercial Sized Tees

Omegaflex® offers the broadest range of commercial sized tees for the **TracPipe® CounterStrike®** flexible gas piping system. Our tees are designed to eliminate the need for labor-intensive black iron fittings and are made of corrosion resistant brass. Available in 40 reducing and true run variations from 3/8 inch up to 2 inches in diameter. Contractors use **TracPipe® CounterStrike®** products exclusively on commercial and residential installations, saving time and enhancing the safety of the gas piping system. All **TracPipe® CounterStrike®** components are made in the USA.

Other features include:

- **AutoFlare®** attachment on three sides, the industries most reliable
- Eliminates potential leak points
- Reduces installation time
- Eliminates the need for welding

**7 Sizes
Available-**

See Price List

Using the **TracPipe® CounterStrike®** Commercial Tee, which features the **AutoFlare®** attachment on all three sides, an installer makes only three connections instead of six. Cutting the number of connections in half saves time while also eliminating potential leaks. The patented **AutoFlare®** fitting is the only flexible gas pipe fitting that is self-flaring and self-piloting to the pipe's inner diameter. No special tools are required. The tees make a perfect seal everytime.

For more information on the commercial tee series, find training and how to install this product and the rest of the **TracPipe® CounterStrike®** system, visit:
